## Blue white f-300 flow meter manual diagram chart

For example, 1-1/2" PVC pipe only needs 7-1/2" before and 3" after the spot the F-300 Blue White flow meter is inserted. The flow meter will perform best if installed in a clean, smoothly-drilled pipe. Measure the pipe and mark the spot you will be installing your flow meter. This entry was posted on September 26, 2017 by Korey. Besides its low profile, the F-300 flow meter is full of great features! First, it is simple to use. The last step of installing a Blue White meter is to tighten clamps evenly on each side of the body. Continue reading for full instructions on how to install a Blue-White flow meter correctly. Step 3: Installing Before installation, check to ensure the system flow direction matches the direction of the arrow printed on the Blue-White F-300 Flow Meter body, at the base of the scale. Debris can be removed by flushing water through the pipeline. Component 9500005. Next, use a deburring tool to smooth out the hole. The pipe length requirements for this flowmeter are roughly half of most other Blue-White flowmeters, making it perfect for systems that don't have several feet of pipe where you want to measure flow. (It is recommended to drill a pilot hole before the final hole.) Step 2: Cleaning When drilling is done, remove any PVC debris from the pipeline. F Series meters must be mounted at the vertical (twelve o'clock) position on horizontal pipe. Once the meter is installed, you will have a way to view system flow rate with zero float bounce, an easy-to-read display, high accuracy, and a stick-free float. You do not want PVC pieces clogging up your pipeline. Step 1: Drilling You will need at least 5X the pipe diameter before the flow meter and 2X the pipe diameter after. Using a 5/8" drill bit, drill a hole in the spot between the minimum pipe measurements. Pipe Size: 1-1/2" Max Working Pressure: 75 PSI (5.17 bar) @ 70°F (21°C) Max Fluid Temperature: 190°F / 88°C @ 0 PSI Meter Body Material: Acrylic Gasket Material: Neoprene Connection Type: Saddle Flow Range: 10 - 70 GPM (10-60 SCH 80) \*Compatible for replacement on the following Accu-Tab® chlorinator units: PowerBase 3500, PowerPro 3150. Product Questions No questions yet. Compatible with schedule 40 and 80 PVC pipe, and with the ability to measure flow rates from 2 to 10 feet per second (pool industry standard), the F-300 is great for your everyday flow monitoring needs. You can use a deburring drill attachment or a hand-operated deburring tool. Includes stainless steel clamps for easy install. Be the first to ask the question!
